PROFILE

Computer Science graduating student majoring in Machine Learning at National University – Lipa, with a background in analytics, deep learning, and computer vision. Experienced in CNN-based image classification and predictive modeling using TensorFlow and Keras. Also knowledgeable in web development with experience in front-end and basic back-end development.

EDUCATION

National University – Lipa BS Computer Science Major in Machine Learning *2022 – 2026*

- ***Relevant Coursework:*** *Machine Learning, Artificial Intelligence, Deep Learning, Computer Vision, Natural Language Processing, Mathematical Analysis, Discrete Structures*

PROJECTS

Predicting Enrollment Probability Using KNN and Random Forest || NU-Lipa School Commission Project

· I was one of the selected project members, assigned mainly to frontend tasks. I contributed by developing and reviewing the user interface and by checking other system components related to the frontend integration.

Leaf It Up to Me

· A web-based computer vision system that leverages a MobileNetV2-based Convolutional Neural Network (CNN) to perform multi-class classification of coffee leaf images into Healthy, Rust, Rhoma, and Miner disease categories.

NPK Deficiency Detector in Bifler Gourd Leaves || Software Engineering Project

· Developed a Deep Learning CNN model using ResNet50 to classify bitter gourd leaves as healthy or deficient in nitrogen, phosphorus, or potassium. As the lead AI programmer and data scientist, I handled dataset preparation, model design, and performance tuning.

Coffea Liberica Farm Geomapping and KNN-Based Sensory Lexicon Classification || *Thesis Poject*

· Developed a Coffea Liberica farm geomapping and sensory lexicon classification system using K-Nearest Neighbors (KNN). Assisted in dataset preprocessing, feature extraction, model implementation, and accuracy evaluation to classify flavor and aroma descriptors.

Key Skills & Certifications

Programming: Html, CSS, Java, JavaScript, Python, MySQL || **Frameworks**: Tensorflow, Keras, React

Prompt Engineering Specialization *- Coursera (Vanderbilt University)*

ChatGPT Advanced Data Analysis *- Coursera (Vanderbilt University)*
