PROFESSIONAL SUMMARY

Fresh BS Computer Science graduate (Machine Learning specialization) with hands-on experience building full-stack systems, providing technical/end-user support, and managing databases and digital records. Adaptable and detail-oriented, with a strong foundation in systems development, IT support, and process documentation — well-suited for IT/Systems, Technical Support, or Application Support roles within corporate or manufacturing environments.

CORE SKILLS

- **IT & Technical Support:** end-user troubleshooting, systems maintenance, technical documentation
- **Systems & Database Management:** MySQL, Firebase, PostgreSQL, data integrity & records management
- **Web-Based Systems Development:** React, Node.js, process automation, workflow systems
- **Reporting & Data Analysis:** dashboards, real-time statistics, data visualization (Recharts)
- **Productivity & Collaboration Tools:** MS Excel, MS Word, Google Workspace, Git/GitHub
- **Interpersonal:** adaptability, fast learner, teamwork & cross-functional coordination

TECHNICAL PROFICIENCIES

- **Programming Languages:** Java, JavaScript, Python, PHP, MySQL
- **Frontend Development:** React, HTML, CSS, Tailwind CSS, Vite
- **Backend & Database:** Node.js, Firebase (Firestore, Authentication, Storage), PostgreSQL
- **AI / Machine Learning:** TensorFlow, Keras, NumPy, CNN, KNN
- **Tools & Deployment:** Git, GitHub, Vercel, Railway

WORK EXPERIENCE

Municipal Government of Cuenca, Batangas (SB Office)

April – June 2026

IT & Systems Support / Full-Stack Developer Intern

Cuenca, Batangas, Philippines

- Provided technical/end-user support and system troubleshooting while designing and developing two full-stack systems for the Sangguniang Bayan SB Office — the SB Document Management System React, Firebase, Supabase, serving 21 barangays, and the Franchise Tracker React, Tailwind CSS, PostgreSQL with 665 tricycle driver records.
- Managed digital records and database entries, ensuring data integrity across departments; implemented role-based access control and multi-stage approval workflows to standardize document processing.
- Built admin dashboards with activity audit logs, bulk operations, real-time statistics, and data visualizations to support management reporting and decision-making.
- Set up automated SMS/Viber notifications and CSV import tools, and deployed both systems on Vercel with proper security rules and access permissions — experience directly transferable to corporate systems/IT support and process-improvement roles.

RELEVANT PROJECTS

Predicting Enrollment Probability for NU-Lipa Admission

2025

Data & Systems Developer

- Built a predictive data model K-Nearest Neighbors trained on historical records and integrated it into a working system with a user-friendly interface and real-time reporting — delivered actionable insights to support data-driven institutional decisions.

Coffea Liberica Farm Geo-Mapping & Classification System (Thesis)

2026

Systems & Data Developer

- Developed a geo-mapping and data classification system integrating spatial and sensory data for product traceability and quality verification — applicable to inventory, quality control, and traceability systems in a production environment.

EDUCATION

National University – Lipa

2022 – 2026

Bachelor of Science in Computer Science, Specialization in Machine Learning

Lipa City, Batangas, Philippines

Dean's Lister (1st Year – 2nd Year)

CERTIFICATIONS

- IC3 Digital Literacy Certification GS6 – Certiport
- Introduction to AI – Google
- Prompt Engineering Specialization – Coursera (Vanderbilt University)
- Trustworthy Generative AI – Coursera (Vanderbilt University)
- ChatGPT Advanced Data Analysis – Coursera (Vanderbilt University)

KEY STRENGTHS

- Fast learner who adapts quickly to new tools, systems, and work environments
- Strong attention to detail in data handling, documentation, and quality checks
- Comfortable working both independently and as part of a cross-functional team
